Mr. Cleveland could have been elected by a big majority, without the electoral vote of New York.

The other States, however, which gave him their electoral vote are delighted and gratified that the great Empire State gave him such a great majority. Senator Hill, Bourke Cockran, Chairman Sheehan and Chief Croker and the other New York leaders who opposed Mr. Cleveland at Chicago, forgot past differences and worked like Trojans.

Tammany did faithful and effective work, and deserves due credit.

A NEW candidate for the laurel ship of England has sprung up, in the person of the Marquis of Lorne. He has not heretofore distinguished himself as a warrior of the Muse, but that is a minor consideration. He has many and weighty claims to the position. In the first place, he is the Queen's son-in-law. He is also a scion of the house of Argyle. His family name is Campbell, which was the name of one of Britain's real poets. He has furthermore written several pieces for the papers and magazines, some of which have been published. In addition, he is a proficient performer on both the pipes and fiddle of his native country. There would be royal economy in making him poet laureate. Besides keeping the office in the family, it would furnish steady employment to a young man whose only business hitherto has been to act in the capacity of a door-mat to his royal brothers-in-law. Over and before all other considerations, Lorne is a canny lad and would take the job at a reduced salary, just for the prestige it would give him among the publishing folk. Then, too, he could make a whole raft of clothes for himself out of one corner of Tamnyson's mantle.

When the secret history of the past ten years in Egypt becomes made known it will be a revelation of treachery and cruelty almost without a parallel. The betrayal of Arabi Pasha, the bombardment of Alexandria, the murder of Oliver Pain and attempted murder of Osman, the annihilation of Hicks Pasha's command, and Gordon's effort to reestablish slavery, followed as it was by swift retribution on his own head—what a chapter of infamy to set off against the pretended pacification of the country by England!

GENERAL STEVENSON shares the glory, he shared the labor, of our victorious campaign and, make a note of it, his tall figure and honest face will loom up—a mighty thing—in the next Democratic National Convention. Who is it a coming? Why, Adlai.

WEAVER is "talking through his hat" up at Des Moines, Iowa. Mr. Lease, no doubt, is talking through her bonnet somewhere in Kansas. If these two unfortunates were in North Carolina we'd send 'em to Saulston.

GR VER CLEVELAND is the only man who ever was three times nominated for the Presidency: he is the only man who was ever President, that was four years out of the White House and then re-elected. He is the only man who ever received as many as 300 electoral votes. Distinguished, as he is able and honest and fearless, Grover Cleveland is indeed the man of destiny.

The New Congress.

The present United States Senate has a nominal Republican majority of 6. The present and the new Senate will stand as follows:

Present Senate. New Senate.
Republicans.....47 Republicans.....39
Democrats.....39 Democrats.....41
Populists.....2 Populists.....6

The foregoing figures do not present the actual political attitude of either the present or the new Senate. In the present Senate there is not less than from 10 to 15 majority in favor of tariff reform and against the whole policy of the McKinley bill, and there is not less majority against the Force bill. On the leading issues which triumphed with Cleveland, the present Senate with its nominal Republican majority of 6, is practically a Cleveland Senate, and Senator Cameron is with the majority.

the vote of a Democratic Vice-President; but there are not less than from 5 to 10 now classed as Republicans and Populists who will support President Cleveland on all important questions. In addition to this substantial Democratic majority already assured, the States of New Mexico and Arizona will be admitted and add four Senators to the Democrats. Both Territories have framed and adopted Constitutions by popular vote, but they were excluded solely because they are Democrats. Bills have already passed the present House for their admission, and it is probable that they will be admitted before the close of the Harrison administration.

The next House will have a Democratic majority over all shades of opposition of nearly or quite one hundred.—Philadelphia Times.

The next Congress.

FACTS ARE SUBBORN THINGS.

(From Tarboro Southern, July 17.)

While visiting Tarboro, on July 8th, I was requested to visit Miss Mary E. Staton, seven miles from town, who for seven weeks had been suffering excruciating agony from some blood poison, supposed to be poison oak. On last Tuesday, at her request, I went to see her, and expected to see great suffering, but was not prepared for the scene that met me. I found the patient broken out all over with an eruption which had occasioned intense itching that during the proxymies was perfectly uncontrollable, and had scratched and torn herself to pieces until her agony was indescribable. During these paroxysms she would have to be held, and her screams could be heard a long distance. She would pray for death to come to her relief, her whole body was purple and raw, exuded a low water which saturated the bed through several thick quilts—that day she had possessed herself of a thick gatta-percha coarse comb, and before she could be prevented, had raked herself with it with such force as to breed out some of the teeth, thus doing her agony. She was attended by some good physicians as Tarboro and her neighborhood could afford, but their treatment afforded only occasional relief by outward applications, and no permanent benefit, as the paroxysms continued to return with increasing violence. Upon viewing the condition of the patient I called the family together and told them to bear witness that I promised nothing. I could not tell whether my remedy would relieve or not, as I had never even imagined such suffering, but it could do no harm and might do good. I then gave her a large dose of the Bitters and as soon as the paroxysm was over, I sponged her whole body with the Wash. While doing so she said to me, "Oh, that does feel so good!" I then gave her another dose of the Bitters, and she was soon in a sweet sleep. I continued this treatment, and whenever the itching would recur I would sponge the body instantly with the Wash, which in every instance allayed the irritation or itching and ward off those violent paroxysms. She did not have an attack during the day, and at 4 o'clock on Wednesday afternoon the itching would recur, but very time was allayed by the application of the Wash. I left her Wednesday evening and comfortable, with directions for treatment to be continued during the night and as long as was necessary. I came again to see her to-day, Saturday, the 12th, and found her up and dressed and in the regular prosecution of her household duties. She is entirely free from all signs of the poison, and I have to thank the Bitters some time to completely eradicate the poison from her blood. During the day she frequently called for the Bitters, as she traveled its soothing and quieting effects, and during the day I administered a whole bottle, with the above results, thus proving what I have always claimed, that my Remedy in an infallible antidote for blood poisons.
